Synergy and Security
the keys to sustainable global investment

2019 COLLOQUIUM ON INTERNATIONAL LAW

- Over the past 30 years, Huawei has served more than three billion people around the world.
- We support the stable operations of more than 1,500 carrier networks in over 170 countries and regions.

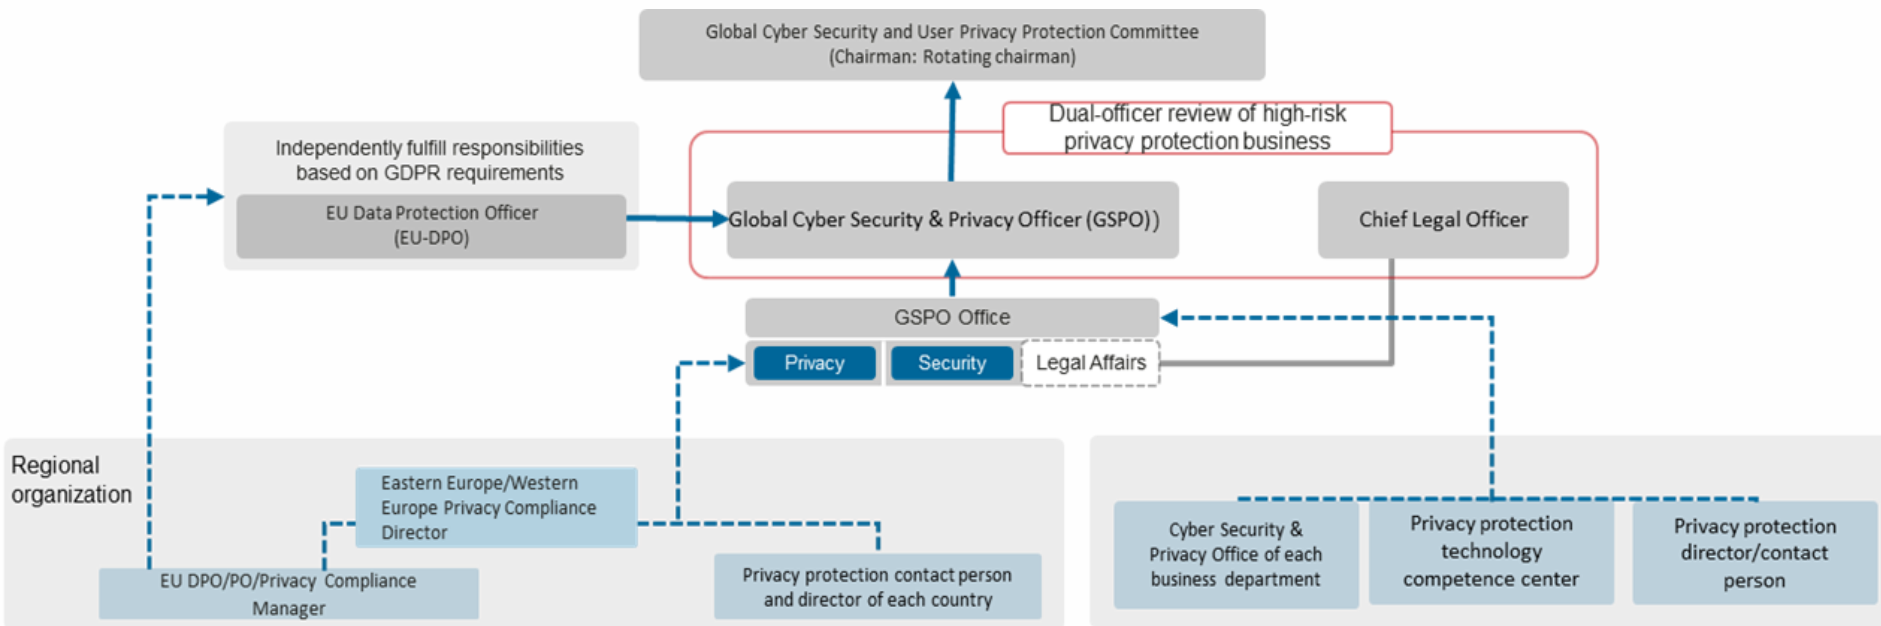

Cyber Security Challenges

- Fast-developing digital technology has brought new security challenges.
- The global community lacks a common and unified understanding of cyber security.
- The industry lacks a unified set of technical standards for security.
- In some countries, cyber security management lacks legislative support, and cyber security enforcement is not mature.

Cyber Security Assurance Framework

- Huawei undertakes that as a crucial company strategy, it has established, and will constantly optimise, an end-to-end cyber security assurance system.
- Such a system will incorporate aspects from corporate policies, organisational structure, business processes, technology and standard practice.

Huawei Governance: Top-Down Governance Architecture, Ensuring Effective Execution and Supervision of Activities

Involved meetings and their operations:

- Privacy Compliance Steering Committee: Monthly
- Privacy issue coordination meeting: Biweekly
- Privacy progress and decision-making meeting of regions and business departments: Weekly or biweekly
- All the meetings have made decisions for 147 business compliance issues that are not clearly defined by laws, and have provided appropriate privacy compliance policies based on risks and collective decision-making

ABC principle

At Huawei, we use the ABC principle for security:

- Assume nothing.
- Believe nobody.
- Check everything.

DIGITALL

Huawei's ABC principle in cybersecurity

ABC principle

Trust needs to be based on facts.

Facts must be verifiable, and verification must be based on common standards.

We believe that this is an important model for building trust in the digital era.

DIGITALL

Statement of CEO Ren Zhengfei

Huawei guarantees that its commitment to cyber security will never be outweighed by the consideration of commercial interests.
